MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Our Group is a well-established integrated offset printing and packaging solutions provider in Malaysia with more than 50 years of experience. Moreover, the Group has also set foot in the Philippines in June 2016 to set up our printing and packaging production line to better serve our customers in the region.

We principally provide offset printing services and packaging boxes, instruction manuals and inserts to our customers. We continue to focus on strengthening our market position in the offset printing and packaging industry.

Our Group offers a wide range of packaging products to meet our customers' packaging needs. These products can be broadly categorised into (i) packaging; (ii) inserts; (iii) instruction manuals; and (iv) labels.

The following table sets forth the details of our Group's revenue by types of products for the nine months ended 31 May 2022 and 2021:

	Nine months ended 31 May			
	2022		2021

Our Group's total revenue amounted to approximately RM196.2 million and RM196.7 million for the nine months ended 31 May 2022 and 2021 respectively. Approximate 59.8% (2021: 70.5%) of our revenue was attributable to our customers in Malaysia, with the remaining from Singapore and the Philippines during the reporting periods.

Packaging

Packaging accounts for our largest business segment of our Group's business. Packaging includes the manufacturing of packaging boxes and rigid boxes. Our packaging boxes and rigid boxes are produced with multi-colour sheetfed offset printed materials and manufactured using technologically advanced machines and colour management system of international standards such as Ugra/Fogra Media Wedge CMYK V3.0 to match the requirements of our customers. Our packaging not only serves as a

marketing tool but most importantly as a protection for our customers' products. Our Group also provides product development services to customers who require packaging design for their products. Furthermore, our Group also has the capability to create prototype based on the design that was provided to us or created by our team. We have an industrial cutting machine that can produce such prototype to help customers visualise the packaging before mass production.

Our revenue from the production of packaging were approximately RM139.0 million and RM130.3 million for the nine months ended 31 May 2022 and 2021 respectively, representing approximately 70.9% and 66.2% of our total revenue, respectively.

Inserts

The production of inserts is our second largest business segment. Inserts are protective packaging used inside boxes to partition and protect products from damage. It is used to keep the products and accessories in position so that they will be neatly presented to the end consumers. Our Group is involved in designing and die-cutting of corrugated boards into desired shapes to fit and protect the customers' products in the packaging boxes.

Our revenue from the production of inserts were approximately RM42.1 million and RM40.4 million for the nine months ended 31 May 2022 and 2021 respectively, representing approximately 21.5% and 20.5% of our total revenue, respectively.

Instruction Manuals

The production of instruction manuals is the third largest segment. Our Group also provides kitting services by packing related printed materials to be grouped together with instruction manuals into a package. This service provides convenience to our customers by enabling them to liaise with one single party for their packaging needs.

Our revenue from the production of instruction manuals were approximately RM14.7 million and RM26.0 million for the nine months ended 31 May 2022 and 2021 respectively, representing approximately 7.5% and 13.2% of our total revenue, respectively.

Labels

The production of paper-based labels is a small segment of our Group's business, primarily for food and beverage sector. Such labels are mainly used for branding of canned/bottled products. The printing of labels has become a smaller business segment of our Group due to our Group's expansion into other business segments.

Our revenue from the production of labels were approximately RM0.3 million and RM0.1 million for the nine months ended 31 May 2022 and 2021 respectively, representing approximately 0.1% and 0.1% of our total revenue, respectively.

FUTURE PROSPECTS AND OUTLOOK

Our Group continues to focus on strengthening its market position in the offset printing and packaging industry as well as approaching reputable international brands from different industries to grow our business in Malaysia and the Philippines.

As disclosed in the 2021 Financial Statements, our Group acquired an additional Auto Diecut machine and also in the process of acquiring two units of Manual Diecut machines that can cater for large format packaging.

Our Group further acquired a new Automatic Rigid Box Making machine which will increase production speed and output resulting in operational efficiency and cost savings. On moving towards more in-house production, our Group has acquired one Fully Auto OPP Lamination machine, one Automatic Magnet Pasting machine and one Double Side Adhesive Tape Pasting machine. This will reduce our reliance on external subcontractors and increase production efficiency by reducing manual processes. In addition, one Single Facer machine and one High Speed Spot UV/IR Coating machine were acquired for the purpose of supporting in-house production.

In conjunction with the acquisition of the new machines, our Group conducted a relocation exercise and enhanced the necessary facilities in our factory in Malaysia. The re-layout has enabled us to achieve better efficiency in terms of production lead time and output and also increase efficiency between processes for overall synergy.

We had also transferred the KBA Rapida 5 Colour Sheet-Fed Offset Press machine to our Philippines plant to increase their printing capacity.

At the time of writing, there remains significant uncertainty on the extent of the impact from the Pandemic. In spite of the high vaccination rate in Malaysia and certain countries, other countries have not been able to achieve the rate to achieve herd immunity. This will result in uncertainties in the global economy and we expect financial year 2021/2022 to remain challenging to the Group.

The Directors will focus its efforts to closely monitor and review its business strategies and strive to create long term sustainable value for our Company and shareholders of the Company (the “**Shareholders**”) in spite of the Pandemic.

FINANCIAL REVIEW

Revenue

The management has adopted proactive strategies and policies to cope with the Pandemic including developing and obtaining new customers and streamlining manufacturing processes in the plant to improve cost efficiency. Meanwhile, relationships with existing customers have been enhanced and the management will closely monitor and remain alert for disruptions due to Pandemic and other potential issues.

During the nine months ended 31 May 2022, the revenue slightly decreased by approximately 0.2% or RM0.5 million as compared to that of the same period in 2021. The decrease in revenue was mainly due to the increase in sales of packaging and insert, where there was an increase in demand derived from major customers, which was offset by the decrease in sales of instruction manual. The revenue contributed by the top five customers decreased from approximately RM153.2 million for the nine months ended 31 May 2021 to RM129.2 million for the nine months ended 31 May 2022, which accounted for approximately 77.9% and 65.9% of our total revenue for the corresponding periods, respectively.
